Jln. Rancabentang No. 250, Cibeureum Cimahi Selatan, Jawa Barat - Indonesia 40535

As an adaptable PHP Developer, my journey goes beyond the confines of PHP, as I continually evolve with the dynamic landscape of back-end technologies. With a keen eye on industry trends, I seamlessly integrate emerging technologies into my skill set, ensuring a forward-thinking approach to web development. My commitment to staying at the forefront of the ever-changing tech ecosystem extends beyond mere languages; it's about embracing a holistic understanding of the evolving back-end landscape. Let's connect and explore the exciting possibilities that arise from this ever-evolving technological journey.

Work Experiences

Astra Graphia Information Technology - Jakarta Selatan, Indonesia

Apr 2023 - Present

PHP Developer / Full-Time

At PT. Astra Graphia Information Technology (AGIT), I played a role in enhancing the service quality at PT Telekomunikasi Selular. Collaborating closely with various divisions, my responsibilities included maintaining the SSOE website, which served as a valuable resource for support teams assisting customers. By presenting reliable and up-to-date information, the website became a trusted reference for evaluating and improving the services provided. This enabled the support teams to make well-informed decisions, fostering a customer-centric approach and ensuring the delivery of exceptional services.

- Administer the Grafana-based website for data visualization and reporting at SSOE.
- Automate data retrieval and integration with PHP, optimizing processes for efficient data management.
- Oversee server operations, ensuring smooth execution of scheduled tasks for efficient data processing.

SobatDev Anagata Solusi Teknologi - Kab, Bandung, Indonesia

Feb 2023 - Present

Founder / Full-Time

We specialize in providing technology solutions for organizations and companies aiming to enhance efficiency through digitalization. With expertise in web development, we deliver customized, user-friendly solutions to modernize processes and drive growth. Our goal is to simplify and accelerate business operations by leveraging technology, ultimately improving productivity for our clients.

- Back-End Developer specializing in database engineering and API development.
- Responsible for managing project flow and ensuring efficient development processes.
- Ensuring high-quality code output and adherence to coding standards.
- Overseeing CI/CD processes and server optimization for optimal performance and security.

Telkom University - Kab, Bandung, Indonesia

Feb 2023 - Apr 2023

Human Resources Information System / Full-Time

As a Human Resources Information System (HRIS) at Telkom University, my role focuses on meeting the information system needs of the Human Resources Directorate. I leverage technology to streamline and organize HR activities, contributing to the digitalization and automation of HR processes. By implementing efficient systems, I ensure seamless operations and effective management of human resources within Telkom University.

- Developed and maintained the Portal HR Web App, providing a centralized platform for HR-related information and services.
- Designed and implemented the HR Dashboard Web App, offering comprehensive insights and analytics for HR data.
- Contributed to the development of the Recruitment Web App, streamlining the hiring process and enhancing candidate management.

Bandung Techno Park - Kab, Bandung, Indonesia

Jun 2022 - Feb 2023

Full Stack Web Developer / Full-Time

As a Full Stack Web Developer at Bandung Techno Park, my primary focus is on developing the "Sistem Informasi Akademik" (Academic Information System) website. I am responsible for develop its functionality, usability, and smooth operation, supporting efficient academic information management within the university campus.

- Involved in the entire development lifecycle of web applications as a Full-Stack Web Developer.
- Responsible for designing and implementing user-friendly interfaces and database structures.
- Conducted thorough testing and debugging to ensure high-quality and error-free code.
- Collaborated with cross-functional teams to gather requirements and deliver scalable solutions.

Schole Fitrah - Kab, Bandung, Indonesia

Aug 2021 - Jun 2022

Web Specialist / Internship

During the Kampus Merdeka internship program organized by the Ministry of Education and Culture (Kemendikbud) in Indonesia, I had the opportunity to work as a Web Specialist at Schole Fitrah, a subsidiary of Semua Murid Semua Guru. In this role, my primary focus was on developing the company's website as an informative and educational platform.

- Back-End Developer focusing on security, performance, and features of the educational website.
- Project coordinator, ensures efficient, controlled and scheduled project management.
- Embedded Engineering role to accommodate learning designer team needs using Arduino-based IoT tools.

Bandung Command Center - Bandung, Indonesia

Jun 2021 - Sep 2021

Web Developer / Internship

Bandung Command Center, a division within Dinas Komunikasi dan Informatika (Diskominfo) Kota Bandung, I had the opportunity to gain valuable work experience in the city government sector with a startup-style approach. As an intern, I actively participated in various activities, including website management and content updates to streamline office activities and enhance online interactions. I also collaborated with the multimedia team to execute live broadcasts and utilized Augmented Reality (AR) on Instagram Effect to create captivating and innovative promotional media.

- Website management and content updates, ensuring a seamless user experience and providing up-to-date information.
- Collaborated with the multimedia team to successfully execute live broadcasts, enhancing engagement and interaction.
- Utilized Augmented Reality (AR) on Instagram Effect to create captivating and innovative promotional media, leaving a lasting impression.
